

1/9 Inch Endoscope Lens

Our 1/9 Inch Endoscope Lens can be customized with a scratch-resistant and oil-resistant glass shell. The endoscopic lens plays an important auxiliary role in medical inspection. The purpose of the endoscopic lens is to guide the image, which transmits the image reflecting the endoscopic situation of the organ. The monitor is convenient for the doctor to observe the details of the tissue in the cavity clearly, and provides help for the doctor's safe operation and fine operation.

We are the 1/9 Inch Endoscope Lens direct manufacturer, the PM904B endoscope lens is designed and produced all depending on our own, so the price is quite reasonable and the lens is of high performance compared with others, the product capacity of our company is up to 20K per month. We also can produce the goods according to your needs and be able to give some expert suggestion on design and how to coordinate with other parts of your endoscope devices.
